

From

PRESCRIPTION to your HOME

Specialty medicines help millions of people with cancer, MS, arthritis, and many other health problems. But you can't get them at your corner drugstore.

Here's what you need to know.

Meet Jon.
He has **CROHN'S DISEASE.**
It's hard to live with.

His **gastroenterologist** writes a prescription for **Remicade.**

She sends it to a **specialty pharmacy.**

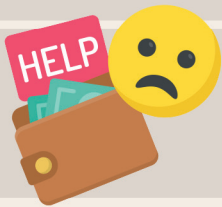

THE PHARMACY CALLS JON:
"WELCOME to the **SPECIALTY PROGRAM!**"

The Pharmacy Benefit Manager (PBM) checks

JON'S PRESCRIPTION PLAN

to make sure it covers **Remicade** for **CROHN'S DISEASE.**

JON IS COVERED!

But he can't swing the copay or high deductible.

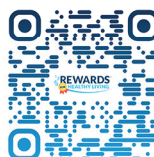

Patient Financial Advocates (PFAs) help Jon get more coverage from:

- Drug makers' Patient Assistance Programs
- Prescription discount cards
- Medical organizations
- Private foundations
- Other sources

A Specialty Pharmacist:

- Helps with patient and insurance portals
- Fills the prescription
- Tells Jon how to take it
- Discusses side effects
- Ships the medicine to Jon's home
